

TORRINI ASSIALI

SERIE "ET"

Le prestazioni indicate nei diagrammi si riferiscono ad aria alla temperatura di 15°C ed all'altitudine di 0 mt s.l.m., e sono state ottenute in installazioni di tipo "C" in assenza di reti e accessori.

PRESTAZIONI

4 poli/poles (1500 rpm) - monofase/mono-phase (1Ph-230V 50Hz)

Modello	Portata (m ³ /h)	PM (Kw)	In max (A)	Mot. (H)	Lp dB (A)
ET41M	6000	0,25	1,8	71	59
ET51M	7000	0,37	3,3	71	63

SERRANDE SA

Le alette della serranda di gravità si aprono con il movimento dell'aria a ventilatore acceso e si richiudono per gravità al suo spegnimento evitando dispersioni di calore.

ACCESSORI-BASI DI APPOGGIO

Le basi d'appoggio ondulate **SB** (converse) realizzate in robusta vetroresina, sono adatte per l'installazione dei nostri torrini su coperture costruite in lastre ondulate, evitando dannosi ristagni d'acqua attorno al ventilatore e costose opere murarie o di carpenteria.

VERSIONI

BDI e BC: utilizzabile con torrini aventi basamento 930x930 mm (Modelli ET61 e ET71).

RD: riduzione da accoppiare con basi **BD** e **BC** per installazioni torrini aventi basamento 760x760 mm (Modelli ET51-56-57).

Le basi possono essere accoppiate a lastre ondulate con pendenza falda tipo:

- **BD1 10x146:** internazionale (passo 146 mm altezza 48 mm)
- **BD2 10x177:** "Euro" (passo 177 mm altezza 51 mm mod.)
- **BC:** "Euro" (passo 177 mm altezza 51 mm e raggio di curvatura lastra pari a 3 metri).
